MUTOH RELEASES ROTARY PRINT SYSTEM FOR VALUEJET 626UF FLATBED UV LED PRINTER

Oostende, BELGIUM. Mutoh Europe today announced commercial availability of its rotary printing system for the ValueJet 626UF UV LED A2-size flatbed printer.

Engineered and manufactured at Mutoh in Japan, this new optional rotary printing system will further broaden the spectrum of ValueJet 626UF applications, making worry-free 360° surface printing of cylindrical objects possible.

Easy to mount and unmount, Mutoh's new rotary option enables high-quality printing on objects with a diameter between 30 and 120 mm, a length up to 360 mm and a maximum weight of 1 kg. It has been specifically designed to be user-friendly by integrating a carrying handle, a positioning ruler, an object position retainer and convenient fixation thumbscrews.

Ideal for customised production and one-off designs, the rotary system for VJ-626UF will allow direct printing on a wide range of cylindrical objects: bottles, packaging sleeves, stainless steel or aluminium containers, decorative candles, etc.

The new rotary system will be displayed on Mutoh's booth at Fespa (Hall 1.2 - B20). The product will be exclusively available through Mutoh's wide network of authorised resellers in the EMEA region.
